rinstrum smart weighing

**axleWEIGH** 

## IN-MOTION VEHICLE SCALE

Rinstrum's axleWEIGHr is a fast, accurate and economical way to monitor commodities that are coming into or leaving your facilities.

Drive over the scale while moving a constant 2-3 mph. The scale will automatically weigh each axleWEIGHr and print a receipt with individual axle weights and the total. If you store the trucks ID and tare weight, or use 2 pass weighing, the controller will calculate the Gross, Tare and Net values.

### 1 Pre-cast Platform Structure

- Install on a minimum of 12" of compacted flat and level CA6 crushed limestone. NOTE: More than 12" is required for certain soils to maintain a solid base.
- Concrete approaches increase accuracy and reduce maintenance and cleaning
- Entire scale is semi-portable and can be easily be moved from site to site

### 4 Accuracy and Performance

- Better than 0.5% accuracy on average with proper use and installation
- Efficiently track profits and inventory movement without stopping on the scale
- Fastest return on investment system to obtain individual axle weights and gross vehicle weight

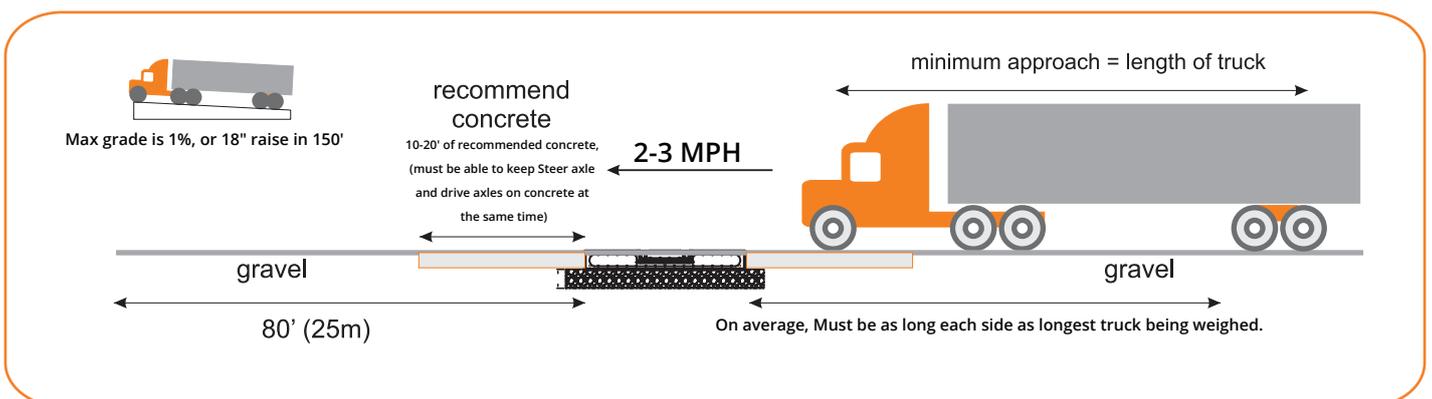

### 3 Service

- No specialty tools or knowledge required to install or maintain scale
- Patented weighbridge removal process allows for easy cleaning and service
- Sloped floor and 4" drain keep scale clean and dry

### 2 Installation

- Durable 5000 psi pre-cast platform structure
- Certified Patterson lifting points on both pre-cast platform and weighbridge
- Installation time is less than 8 hours (2 men) on average install precast platform from beginning to end

## Installation Recommendations

## Accurate

On average better than  $\pm 0.5\%$  repeatability can be expected. Company testing as well as extensive field trials have shown that with extended flat and level concrete approaches  $\pm 0.2\%$  or better accuracy can be achieved. Individual results may vary. Well maintained vehicles weigh the best.

Weighing samples are captured at 100 times per second and then averaged within the offset window.

### Single Pass Weighing With Known Tare Weight

- Press the TRUCK Key
- Enter your known Tare weight then OK
- Drive over the scale
- OR**
- Press the TRUCK Key
- Enter Truck ID to recall a stored Tare weight then OK
- Drive over the scale

### Two Pass Weighing - Weigh In and Weigh Out

- INBOUND**
- Press the TRUCK Key then OK
- Drive over the scale
- OUTBOUND**
- Use Up/Down arrows to select your Truck ID then OK
- Drive over the scale

## SPECIFICATIONS

<b>Capacity</b>	50,000 lbs (20 tons) per axle
<b>Display Resolution</b>	20 lbs (10kg)
<b>Operating Speeds</b>	Structurally Certified for "in road use" at 40 mph up to 50,000 lbs (22.7 tons) Recommended speed 2-3 mph (5 km/h) Speed error above 7 mph
<b>Overload</b>	150% (for 10 tons load cells)
<b>Scale</b>	
<b>Precast Scale Module</b>	Dimensions: 12' x 8'5" x 11.5" (3.65 m x 2.56 m x 0.29 m) Weight: 14,200 lbs (7.1 tons)
<b>Scale Weighbridge</b>	Dimensions: 11' x 2.5' x 5" (3.4 m x 0.76 m x 0.125 m) Weight: 2,100 lbs (1.05 tons) 12' and 12' drop-wall is available.
<b>Load Cell Assembly</b>	Outboard, In-tension cradle assembly, self-contained
<b>Load Cells</b>	4 x 22,000 lbs (10 tons) folded shear beam load cells Stainless Steel, Hermetically Sealed, IP68 ingress Protection, M12 Watertight connectors
<b>Optional</b>	
<b>Clicker System</b>	Remote Truck ID key-fob
<b>Automatic Print</b>	Time/Date, Truck ID, Axle weights, and Gross, Net, Tare weights
<b>Remote Display</b>	4-inch remote display with super bright digits, Stop Go lights and quick disconnect cables
<b>Information Management</b>	We have data collection/management systems for Farms (Harvest Management) plus aggregate and generic for transportation companies.
